SKILLSETS

- I have more than 8+ years of professional work experience in the IT industry, with the emphasis on software engineering and system design, testing and administration.
- Good theoretical background in computer science and software development and adapt to any technology faster.
- Prominent experience in developing and managing data heavy applications and reporting with good analytical and statistical skills.
- Proficient in C#, ASP.NET, Javascript/TypeScript, Python, NodeJS, Dart and PHP, with deep knowledge of web and mobile development and experience with Windows Server, Linux, Apache/WAMP, SQL Server, MySQL and other open-source and proprietary systems.
- Rich experience with the modern client-side development technologies, including TypeScript, Flutter, Angular/NgRx, React/Redux and git/node/npm/webpack toolset.
- Expert in developing scalable data migration scripts and crafting well-abstracted API client libraries and adapters for REST, GraphQL, and Protobuf services.
- Experienced in designing projects, including DEV, QA and PROD clusters using Docker with GitLab CI/CD deployment and automation.
- Manual code review and automated inspection and quality analysis with SonarQube, including rules configuration.
- I have a solid background in frameworks like Scrum and Kanban, but I always put the principles of the Agile Manifesto first, rather than sticking rigidly to any one method.
- Fixing L1 critical system outages, using deep diagnostics to resolve severe bugs in minutes and keep Fortune 500 website operations running smoothly.
- Turn aging systems by refactoring legacy code and integrating modern tools like Elasticsearch, Redis and Edge cache(CDN) dramatically improving their performance and accuracy.
- Developed highly efficient full-stack solutions, from lean backend APIs in multiple languages to optimised frontends that deliver a fast, seamless user experience.
- Implementing robust standards like OWASP to proactively eliminate vulnerabilities and protect client data.
- Good understanding of AWS and Microsoft Cloud technologies, including Power BI, Azure, MS Office 365, SharePoint and PowerApps.
- Developed machine learning for my BEng final assessment on medical imaging and disease detection with DICOM using TensorFlow and Keras.
- Automation control system with solenoid valves, control relays and all programmable electronics.
- Sandboxing experience in containerised application development and deployment using Docker.
- Practical management experience with effectively working with business clients and product owners to review business drivers, needs and strategies to anticipate future business/technology needs.
- I trained and organised colleagues to develop applications that required teamwork such as assessment using some form of agile manner.

WORKING EXPERIENCE AND PROJECTS

- Eight25Media (April 2021 – September 2024)

Senior Software Engineer

Projects

40+ Wordpress (PHP), Drupal (PHP), Umbraco CMS (.NET Core), (Intralink, RJG Inc., Sambanova, Narcan, Morrison Express, HowDo, etc...)

SafeCommunities (ExpressJS, React, MongoDB, Redis)

Responsibilities

- ✓ Scaled project portfolio 7× (\$60K → \$400K) by architecting full-stack solutions for 35+ enterprise clients.
- ✓ Earned promotion to Senior Engineer at 26 after resolving critical bugs 90% faster than peers.
- ✓ Mentored junior developers in full-stack best practices (component design, state management).
- ✓ Collaborating with US/AU stakeholders and cross-functional teams.
- ✓ Built vendor management platform (ExpressJS/MongoDB/React) with Homeland Security API integration.
- ✓ Developed Lucene.NET faceted search, improving resource discovery by 35%.
- ✓ API documentation, creating operational runbooks, or developing training materials.
- ✓ Created reusable libraries for ATS integrations (Greenhouse).
- ✓ Delivered pixel-perfect UIs from Figma/InVision using Tailwind/SCSS (BEM methodology).
- ✓ Optimised animations/interactions (<5% CPU load) with vanilla JS/TS and lazy loading.
- ✓ Reduced build times by 40% via Webpack/Gulp optimization.
- ✓ Automated CI/CD pipelines (GitLab/Azure), achieving 99% clean code via SonarQube.
- ✓ Created Jira dashboards to streamline Agile workflows.
- ✓ Rapidly deployed .NET Core, Umbraco CMS and Elasticsearch, reducing search latency to near-zero.
- ✓ Led migration of 35+ projects to modern stacks (WordPress → HubSpot/Umbraco).

- Hype Web Agency (PVT) Ltd. (April 2020 – March 2021)

Full-Stack Engineer

Application: ENDAKO – Marketplace eCommerce Solution

Responsibilities: Endako is an eCommerce startup based in Sri Lanka. I developed the entire stack as a single developer and developed both the web stack and Mobile application (www.endako.lk)(Discontinued).

Technologies: REST API, PHP Laravel, Dart Flutter, Web Socket

- Modern Group (PVT) Ltd. (February 2016 – April 2020)

Full-Stack Engineer

Application: Restaurant Runner Engine

Responsibilities: The system has an android application with an ordering interface and a web application interface with tables order management system with an additional screen with an ordering interface.

Technologies: REST API, AngularJS, ESC-POS, Web Socket, PHP, CodeIgniter

- **Application:** Inventory Tracker with BI

Responsibilities: Traditional Inventory Management System with Cheque Monitor.

Technologies: jQuery, REST API, PHP, Codeigniter

EDUCATIONAL QUALIFICATION

- B.Eng.(Hons) in Software Engineering
Student ID.: 19030281
London Metropolitan University
ESOFT Campus
- HND in Computer Science
IPEES UK
Nenesala Learning Centre
- Advancing Career Skills – NVQ Level4
Technical College- Sammanthurai
Sri Lanka
- HubSpot Certified Developer
HubSpot Academy

PERSONAL DETAILS

- Full Name - Aabdeen Rifthy Ahmed
- NIC - 963420323V
- Date of Birth - 7th December of 1996
- Sex - Male
- Marital Status - Single
- Nationality - Sri Lankan

COMMUNICATION SKILLS

- Tamil - Native
- English - Fluent
- Arabic - Elementary
- Sinhala - Progressive
